

NEED OF STUDY AT NATIONAL SCALE

I continue to read the JNMA with interest.

There was a letter in Vol. 40 (140), Oct.-Dec. 2001 which interested me, but I have not seen any comment since.

"Need of study at National Scale." It is worth encouraging.

Perhaps Dr. Paudel as a colleague could present a paper at a conference bringing the value of such a study.

And in the early stages, keep it simple and non threatening - responding to such unspoken

questions as "what's in it for me ? - cost - time & trouble" etc.

Perhaps keep it to incidence, include private as well as non private hospitals & provide feed back.

This is by no means a comprehensive letter, may be a caricature of one and intended primarily as an encouragement.
